It's all about the Marketing ~ How can we help you today?

Life Saving Training. Simplified.

At the Emergency Care & Safety Institute, our goals are simple. We want to provide the absolute best training materials available at the lowest prices possible to help you teach others how to save lives. We also strive to eliminate administrative burdens, allowing you to focus on more worthwhile aspects of your job. If these simple philosophies are in line with what you expect from a training provider, then the Emergency Care & Safety Institute is for you.

Who We Serve

The Emergency Care & Safety Institute provides training that leads to certifications that meet job-related requirements as defined by regulatory authorities such as OSHA, The Joint Commission, and state offices of EMS, Education, and Health. Our courses are delivered throughout a range of industries and markets worldwide, including:

- Colleges and universities
- Corporations
- Government agencies
- Hospitals
- Private training companies
- Public safety agencies
- School systems

Offered in Association with

ECSI programs are offered in association with the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP)—two of the most renowned medical organizations in the world. These organizations provide medical direction to the Emergency Care & Safety Institute and stand behind the content of our training materials.

The Emergency Care & Safety Institute's training materials are developed and distributed by Jones & Bartlett Learning, the exclusive publisher for ECSI.

Why Choose ECSI?

With ECSI, you can have everything you want from a single, internationally recognized training organization. Not only do we offer superior training materials to benefit your students and make life easy for you, but they are also available at extremely low prices to benefit your bottom line! Plus, we offer you these benefits without the administrative headaches and fees associated with other training organizations.

Here is why ECSI is the smart choice:

Ease of Administration: ECSI Education Centers manage their own course rosters, have no restrictions on who or where they teach, and are able to teach with other training organizations should they choose to do so. Plus, we do not handcuff our educators with rigid course delivery requirements and allow them to teach our courses the way they choose.

Free Course Completion Cards: ECSI provides free course completion cards with each student manual or online course access code purchased by our Education Centers. Plus, our new “universal cards” enable our Education Centers to issue one laminated course completion card for up to three different courses—saving you both time and money.

High-Quality Materials: When you order your training materials from ECSI, you do not have to sacrifice quality for affordability. Our highly developed, four-color student manuals feature the latest medical content and are filled with tips and tools to help your students succeed. We have also earned a reputation for providing superior instructor support materials that help to make life easy for our educators.

Zero Fees: Joining ECSI is easy and involves no training center or instructor fees. Once you are on-board, you can forget about having to pay recurring fees as well.

How to Join ECSI

The process of becoming a new Education Center or Instructor with the Emergency Care & Safety Institute is easy. First, complete the free Education Center application at www.ECSInstitute.org in order to have your training center approved as an ECSI Education Center. Applications will be reviewed upon receipt. Education Center applicants will receive written notification of the decision within two days after receipt of complete applications.

Once a new Education Center is approved, additional individuals may apply to teach for that Education Center. Individuals can become ECSI Instructors by:

Requesting Instructor Reciprocity

Those with adequate content knowledge (eg, first aid, CPR, AED providers) who can also demonstrate adequate teaching experience (eg, professional educator; state EMS, fire, or police instructor; or an instructor from another nationally recognized training program) can receive instructor reciprocity. Instructor reciprocity requires a simple orientation to the course materials and ECSI policies and procedures. The application for ECSI Instructor status can also be found at www.ECSInstitute.org.

Completing an ECSI Instructor Development Course

Those with little or no teaching experience must participate in a formal ECSI Instructor Development Course (IDC). This course covers topics such as teaching methodologies, complying with ECSI policies and procedures, following course objectives, and conducting skill practice sessions. This course is administered by ECSI Instructor-Trainers.

For a detailed list of ECSI's Education Center and Instructor responsibilities, visit our website at www.ECSInstitute.org or call 1-800-71-ORANGE to speak with a membership representative.

About Instructor Renewal

Instructor cards are valid for two years from initial sign-up date. To retain active status, each Instructor must teach two courses in this period and rosters must be kept on file at the Education Center. The Education Center and Instructor will receive an email reminder prior to reauthorization or expiration.

Throughout 2011, all ECSI Instructors and Education Center Coordinators will be required to participate in ECSI's 2011 Instructor Update presentation. Upon completion of this online presentation, each participant will automatically have their instructor status extended for two years from the date in which they completed the presentation.

Course Materials

ECSI offers complete training programs designed to fully support instructors and provide students with the resources needed learn the knowledge and skills components of the courses in which they are enrolled. ECSI training materials include:

Student Materials

Student Manuals: Our highly developed, 4-color student manuals feature the latest medical content and are filled with tips and tools to help your students succeed. Many of ECSI's manuals are available in electronic format to provide an economical and environmentally friendly alternative to traditional printed manuals.

Online Courses: Each online course can be used as an interactive supplement to reinforce what students have learned in the classroom, or as a distance learning platform where students can complete the knowledge-based component of the course online, then complete hands-on skills evaluations with an instructor. Turn to page 20 for detailed information on our online courses.

Instructor Materials

Instructor's ToolKit CD-ROMs:

ToolKit CD-ROMs include course outlines, PowerPoint presentations, detailed lesson plans, image and table banks, and evaluation forms.

DVDs: Our DVDs provide detailed skill demonstrations that enhance the classroom learning experience for students and assist them through their own practical examinations.

Teaching Packages: ECSI's Teaching Packages combine Instructor's ToolKit CD-ROMs and DVDs in one convenient and cost-effective kit.

Course Completion Cards: ECSI provides free course completion cards with each student manual or online course access code purchased by our Education Centers. Our new "universal cards" enable Education Centers to save time and money by issuing one laminated course completion card for up to three different courses.

Additional Information:

- Our new completion cards are distributed in sheets of six and feature peel-off laminated cards. Unlike previous cards, these new sheets can be re-fed through printers after some cards have been peeled-off.
- Free course completion card printing software may be downloaded from the Member's Area on ECSI's website
- ECSI's course completion cards are only released to Education Center Coordinators

Online and in the classroom, we offer world-class training solutions in the areas of:

- Advanced cardiac life support (ACLS)
- Automated external defibrillation (AED)
- Babysitter safety
- Driver safety
- CPR (layperson and professional levels)
- First aid (multiple courses available)
- Emergency medical responder (formerly first responder)
- Infection control
- Oxygen administration
- And more!

Course Approvals

The Emergency Care & Safety Institute provides training that leads to certifications that meet job-related requirements as defined by regulatory authorities such as OSHA, The Joint Commission, and state offices of EMS, Education, and Health. ECSI has worked to secure hundreds of regulatory approvals throughout the United States and worldwide.

Copies of these regulatory approvals are kept on file and are available upon request. To inquire about a specific approval or request a copy of a letter on file, contact our Regulatory Affairs office by emailing Approvals@ECSInstitute.org. Additional course approvals may also be sought upon request.

"ECSI provides instructors with ready-to-use instructor materials, student resources, and online learning without any of the typical hassle associated with other national training programs. The programs contain all of the necessary ECC information in an informative, yet concise format that is extremely well received by end users."

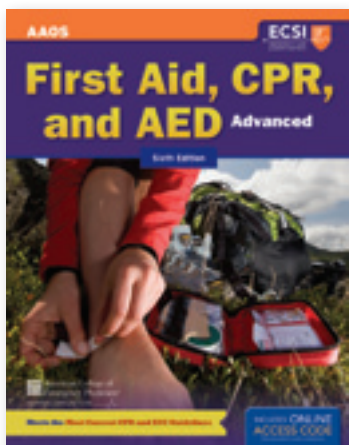

Hudson Garrett, Jr., Atlanta, Georgia

The Emergency Care & Safety Institute is the industry's leading provider of online and blended learning solutions for first aid, CPR, and AED training. Our online courses are simple to use and provide an interactive learning experience for students. Each year, thousands of students use our courses as a supplement or substitute to traditional classroom lectures and have found them to be an exciting and effective way to learn course material. Our online courses are perfect for:

- Busy professionals seeking access to course content anywhere at any time
- Individuals looking to renew their certification to fulfill workplace requirements
- Instructors looking to free up classroom space in order to train more students

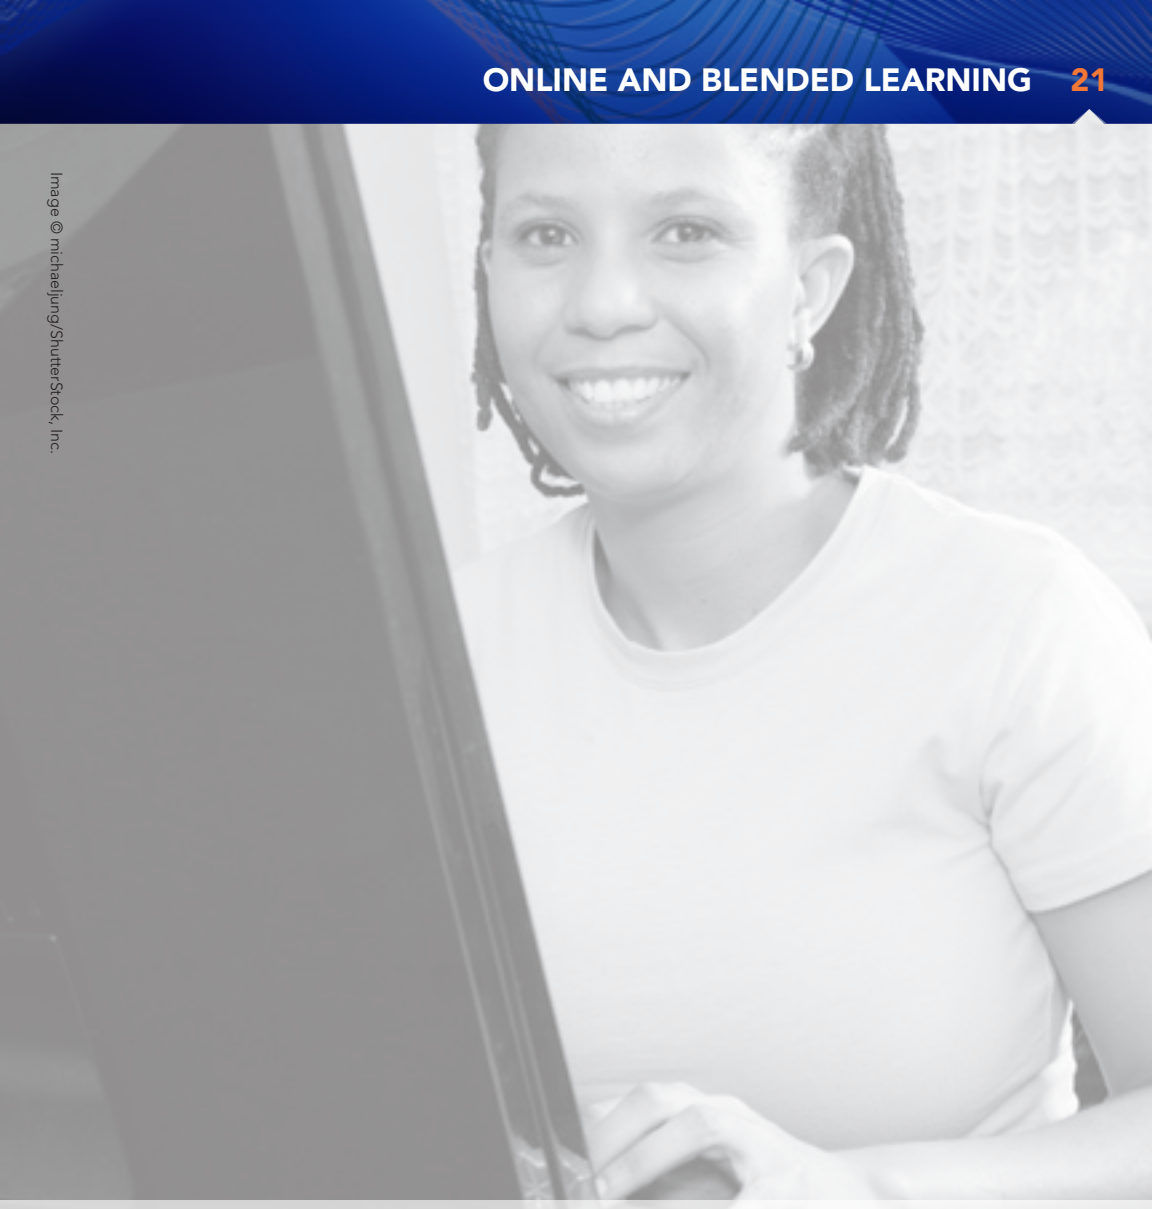

"ECSI makes it so easy for me to order online codes. My students love the ease of taking the course on their own time. I have received nothing but positive feedback from all of my students."

Alison Russell, Fort Wayne, Indiana

How Blended Training Works

Although our online courses can be used as a substitute for classroom lectures, on-site skills examinations are required in order to earn a nationally recognized course completion card from ECSI. Here is how the blended training model works:

1. Students logon to an ECSI course using an access code. These access codes can be purchased by students or supplied by their instructor. Codes may be ordered individually or in bulk.
2. After completing the course and all of its interactivities, students are allowed to proceed to the course's final exam. Students must obtain a minimum score of 80% and will have multiple opportunities to successfully complete the exam.
3. Upon completion of the end-of course activity, students are instructed to print out a Course Acknowledgment Certificate stating that they have successfully completed the online component of the course and are ready to participate in any skills associated with the course.
4. Students bring the Course Acknowledgment Certificate to an authorized Education Center or Instructor for an on-site skills examination.
5. After completing the skills exam, students are issued an official ECSI course completion card from the Education Center.

ECSI offers exciting and interactive online courses in the areas of:

- Advanced Cardiac Life Support
- Automated External Defibrillation
- Babysitter Safety Training
- Bloodborne Pathogens
- CPR- Health Care Provider
- CPR- Layperson
- First Aid
- Lifeguarding

Education Centers can purchase access to ECSI's online courses for less than \$15.00 per student. Plus, a free course completion card is provided with each access code when ordered by the Education Center. For a complete list of online courses and pricing, please call 1-800-71-ORANGE.

That ECSI provided CPR and AED training to almost 4,000 individuals in a single day at the Boy Scouts of America's 100 Years Jamboree?

Yes, almost 4,000 students in a single day which featured 100-degree temperatures, torrential downpours, and lightning storms. If you have an idea for a mass training event and think that ECSI can help, we'd love to hear from you.

That ECSI's Health Care Provider CPR and Advanced Cardiac Life Support courses are accepted by the National Registry of EMTs?

The National Registry of Emergency Medical Technicians (NREMT) and the Continuing Education Coordinating Board for Emergency Medical Services (CECBEMS) have approved our Health Care Provider CPR and Advanced Cardiac Life Support courses for both certification and recertification purposes.

That hospitals can use ECSI's Health Care Provider CPR and Advanced Cardiac Life Support courses to meet The Joint Commission's (JCAHO) accreditation standards and save thousands of dollars annually in training materials?

ECSI's programs are consistent with the latest International Liaison Committee on Resuscitation (ILCOR) Guidelines for CPR and ECC and thus satisfy the requirements of The Joint Commission and other regulatory entities.

That ECSI has secured hundreds of course approvals from regulatory bodies across the globe and we can pursue additional approvals upon request?

Not only can you request copies of regulatory approvals on file, but we will gladly pursue additional regulatory approvals upon request from our members. Contact our Regulatory Affairs office at Approvals@ECSIInstitute.org to get started.
