Media and Criminal Justice
The CSI Effect

Dennis J. Stevens, PhD, University of North Carolina—Charlotte, Belmont Abbey College

*Media and Criminal Justice: The CSI Effect* illustrates how media coverage and television programs influence the public’s perception of criminal justice. Fiction is often mistaken for reality, and this phenomenon, called “The CSI Effect,” adds to the assumption that all criminal cases can be easily solved through the employment of high-tech forensic science, as depicted on television crime shows. Over 400 prosecutors assist in explaining the CSI Effect’s influence, which reinforces America’s troubled wars on crime, junkies, poverty, and immigrants, and produces a greater tolerance of official misconduct and an escalation of wrongful convictions.

This text explores common misconceptions and their consequences and provides readers with the ability to critically analyze information promoted by the media and entertainment.

Myths and Realities of Crime and Justice
What Every American Should Know

Steven E. Barkan, PhD
George J. Bryjak, PhD

Americans know relatively little about the reality of crime and the criminal justice system in the United States, and most of their knowledge is a loose collection of haphazardly accumulated truths, half-truths, and outright falsehoods. The American public’s perception of crime is out of line with crime reality. One consequence of such misinformation on the prevalence of violent crime is that many people are more afraid of being the victim of a violent crime than they realistically should be. *Myths and Realities of Crime and Justice* provides readers with an accurate and up-to-date picture of crime and justice in America. It presents many recent findings from criminologists and criminal justice practitioners and debunks common misconceptions.

Readers will be encouraged to form an opinion on whether or not injustice based on race and ethnicity is a problem, whether or not the laws as written are biased, and whether or not people of particular racial/ethnic backgrounds are prone to commit more crime.
