

## How To Change the Way a Quiz is Displayed to Students

This document contains detailed instructions on tailoring how a quiz within a course is formatted, including setting the number of questions displayed on each quiz page, applying student navigation limitations, and adjusting how questions are shuffled.

 Start by going to the quiz you'd like to edit/format. Most quiz formatting options can be found in the quiz's **Settings.** Settings may be toggled while you are creating the quiz or subsequently adjusted at any time by clicking the quiz and clicking **Settings** in the menu bar at the top.

5. If your quiz contains multiple choice or matching questions, you may choose to automatically shuffle each question's answer choices so that they appear in a random sequence for each student attempt. To institute this behavior, expand the **Question behavior** section and adjust the dropdown menu for the **Shuffle within questions** setting to "Yes."

- 8. To turn shuffling on, click the checkbox to the left of **Shuffle** so that it is checked. When Shuffle is enabled, each student attempt will see a different and random sequence of questions.
  - If you want every student to receive the quiz questions in the same sequence for every attempt, ensure that the **Shuffle** option is deselected.
