1. Ask your instructor to assign a wiring harness for you to perform this task on.
2. Use the terminal removal tool to release the terminal(s) from the connector.
 - a. With your instructor's approval, cut off one terminal to be replaced.
 - b. Have your instructor verify removal of connector and terminal.

Supervisor's/instructor's initials: _____
3. Use the wire stripper to remove the proper length of wire insulation.
4. Follow the service information to crimp the new terminal on the wire.
5. Reinsert the terminals into the connector so the terminal locks into place.
6. Have your supervisor/instructor verify satisfactory completion of this procedure, any observations found, and any necessary action(s) recommended.
