Vehicle used for this activity:

Year _____ Make _____ Model _____

Odometer _____ VIN _____

1. Using appropriate service information, identify system voltage and safety precautions associated with high-intensity discharge headlights, ignition systems, and injection systems.

- a. HID lamp voltage: _____ volts
- b. List the safety precautions required when working on HID system:

- c. Maximum secondary ignition system voltage: _____ volts
- d. List the safety precautions required when working around ignition systems:

- e. Injection system voltage (on a vehicle with a high-voltage injection system): _____ volts
- f. List the safety precautions required when working around high-voltage injection systems:

2. Have your supervisor/instructor verify satisfactory completion of this task.
