**CDX Tasksheet Number: C177**

1. Research specified power steering fluid for this vehicle using the appropriate service information.
  - a. Specified fluid: \_\_\_\_\_
  - b. When should the fluid be checked? Hot: \_\_\_\_\_ Cold: \_\_\_\_\_  
Either: \_\_\_\_\_
  - c. If the service information lists a procedure for flushing the power steering fluid, list the main steps (you can paraphrase, or print off the procedure):

2. Follow the manufacturer's procedure to check the fluid level.

**NOTE** If power steering fluid is below the minimum level, it could mean there is a leak in the system. Investigate this possibility and report it to your supervisor/instructor.

3. Locate the power steering-fluid reservoir.
  - a. List the level of the power steering fluid: \_\_\_\_\_
4. Place a small amount of the fluid from the reservoir on a white piece of paper and describe its condition:

5. Determine any necessary action(s):

6. Have your supervisor/instructor verify satisfactory completion of this procedure, any observations found, and any necessary action(s) recommended.
