Vehicle used for this activity:

Year _____ Make _____ Model _____

Odometer _____ VIN _____

Time off _____

Time on _____

Total time _____

1. Research the fuel filter replacement procedure for this vehicle in the appropriate information.
 - a. List any special procedures and/or tools to perform this task: _____
 - b. Look up the flat rate time for this task: _____ hr
2. Release any fuel pressure in the system by following the manufacturer's recommended procedure.
3. Follow the specified procedure to remove the fuel filter.
4. Have your supervisor/instructor verify removal of the fuel filter. **Supervisor's/instructor's initials:** _____
5. Install a new fuel filter (or reinstall the old one if your instructor directed you to do so).
6. Once the filter is installed correctly, clean up any spilled fuel and dispose of it properly.
7. Apply the vehicle's parking brake and secure the vehicle with wheel chocks to prevent the vehicle from rolling.
8. Turn the ignition switch to run and check for any fuel leaks. Immediately shut off the vehicle if a leak is present. Repair any leaks.

NOTE Ask your supervisor/instructor whether or not to perform the next action before proceeding.

9. Cut the old filter open with a hacksaw to examine the inside. **List what you found inside the filter:** _____
10. Have your supervisor/instructor verify satisfactory completion of this procedure, any observations found, and any necessary action(s) recommended.
