Time on
TITTLE UII

Total time_

CDX Tasksheet Number: C541

NOTE This task may be completed as part of an engine rebuild or done separately on another vehicle.

- 1. List the gaskets and/or seals you are installing:
- 2. Research the procedure and specifications for the gaskets and/or seals you are removing/installing in the appropriate service information.
 - a. List the recommended sealant required for each gasket/seal, if needed:

b. List or print off and attach to this sheet any torque specifications for the cover(s) you are removing:

- **3.** Following the specified procedure, remove the appropriate engine cover.
- 4. Remove any seals and gasket material with the proper tools. Be careful not to gouge or damage the surfaces being cleaned. Also, prepare the sealing surfaces for cover reinstallation according to the service information. List your observation(s):

- **5.** Have your supervisor/instructor verify that the cover is ready to be reinstalled. **Supervisor's/instructor's initials:**
- **6.** Reinstall the cover following the specified procedure. Torque all fasteners to the proper torque and check for any leakage.
- **7.** Have your supervisor/instructor verify satisfactory completion of this procedure, any observations found, and any necessary action(s) recommended.
