## CDX Tasksheet Number: MHT1E007

Student/Intern Info	rmation		
Name		Date	Class
Vehicle, Customer, and Service Information			
Vehicle used for this	activity:		
Year	Make		. Model
Odometer		VIN	

## Materials Required

- · Vehicle with possible engine concern
- Engine manufacturer's workshop materials
- Manufacturer-specific tools depending on the concern/procedure(s)
- Vehicle/component lifting equipment, if applicable

## Task-Specific Safety Considerations

- · Activities may require test-driving the vehicle on the school grounds or on a hoist, both of which carry severe risks. Attempt this task only with full permission from your supervisor/ instructor, and follow all the guidelines exactly.
- Lifting equipment and machines such as vehicle jacks and stands, vehicle hoists, and engine hoists are important tools that increase productivity and make the job easier. However, they can also cause severe injury or death if used improperly. Make sure you follow the manufacturer's operation procedures. Also make sure you have your supervisor's/ instructor's permission to use any particular type of lifting equipment.
- Comply with personal and environmental safety practices associated with clothing; eye protection; hand tools; power equipment; proper ventilation; and the handling, storage, and disposal of chemicals/materials in accordance with federal, state, and local regulations.
- Always wear the correct protective eyewear and clothing and use the appropriate safety equipment, as well as wheel chocks, fender covers, seat protectors, and floor mat protectors.
- Make sure you understand and observe all legislative and personal safety procedures when carrying out practical assignments. If you are unsure of what these are, ask your supervisor/ instructor.

<b>▶</b> TASK	Inspect and pressure test cooling system(s); pressure test cap, tank(s) and recovery systems; inspect radiator and mountings; determine	
		MTST
		I.E.7; P1

Student Instructions: Read through the entire procedure prior to starting. Prepare your workspace and any tools or parts that may be needed to complete the task. When directed by your supervisor/instructor, begin the procedure to complete the task and check the box as each step is finished.

Time off
Time on
Total time

Note: This tasksheet may require the student to check the condition of miscellaneous vehicle fluids, some of which may be flammable and could damage the environment or cause health problems if not handled properly. Observe all safety precautions and follow local regulations for the proper disposal of fluids.

Procedure:	Step Completed
1. Inspect the radiator and recovery tanks for signs of leakage.	
a. Within manufacturer's specifications: Yes: □ No: □	
b. If No, describe the recommended corrective action(s):	
2. Inspect the radiator mounts for loose, missing, or damaged components.	
a. Within manufacturer's specifications:  Yes: □ No: □	
b. If No, describe the recommended corrective action(s):	
3. Test the cooling system pressure cap as outlined in the manufacturer's workshop materials, and record the pressure cap rating.	
a. Cooling system pressure cap rating: psi/kPa	
b. Within manufacturer's specifications:  Yes: □ No: □	
c. If No, describe the recommended corrective action(s):	
4. Record the manufacturer's pressure recommendation for pressure testing the cooling system, and perform the test.	
a. Cooling system pressure test specification: psi/kPa	
b. Within manufacturer's specifications: Yes: □ No: □	
c. If No, describe the recommended corrective action(s):	

5.61.111	T
<ol><li>Start the engine and bring it to operating temperature. Using an infrared thermometer, check the radiator core in multiple locations for hot and cold areas.</li></ol>	
a. Within manufacturer's specifications:	
Yes: ☐ No: ☐	
b. If No, describe the recommended corrective action(s):	
6. Discuss your findings with your supervisor/instructor.	
Non-Task-Specific Evaluations:	Step
	Completed
<ol> <li>Tools and equipment were used as directed and returned in good working order.</li> </ol>	
Complied with all general and task-specific safety standards, including proper use of any personal protection equipment.	
3. Completed the task in an appropriate time frame (recommendation: 1.5 or 2 times the flat rate).	
4. Left the workspace clean and orderly.	
5. Cared for customer property and returned it undamaged.	
Student signature Date	
Comments:	
Have your supervisor/instructor verify satisfactory completion of this procedure, any observal	tions made.
and any necessary action(s) recommended.	

**Evaluation Instructions:** The scoring box below is intended to act as a guide for both student and supervisor/instructor. Each criterion listed will help students to understand what is expected of them and help supervisors/instructors articulate the level of success at a particular task. The scoring is set up to allow a second attempt at each task (see the Test and Retest columns). Scoring is also designed to award students points only for task criteria that were completed correctly. Points are lost for failure to complete the employability requirements (see Non-Task-Specific Evaluation criteria). When all criteria are evaluated, tally the points for a total at the bottom of each column.

## Tasksheet Scoring

	Те	est	Ret	est
Evaluation Items	Pass	Fail	Pass	Fail
Task-Specific Evaluation	(1 pt)	(O pts)	(1 pt)	(O pts)
Student properly inspected the radiator, recovery tank, radiator mounts, and brackets.				
Student properly tested the cooling system.				
Student properly performed the cooling system pressure test.				
Student properly inspected the radiator for hot and cold spots.				
Non-Task-Specific Evaluation	(O pts)	(-1 pt)	(O pts)	(-1 pt)
Student successfully completed at least three of the non-task-specific steps.				
Student successfully completed all five of the non-task-specific steps.				
Total Score: <total #="" 4="%" of="" points=""></total>
