CDX Tasksheet Number: MHT4H001

Student/Intern Infor	mation		
Name		Date	Class
Vehicle, Customer, and Service Information			
Vehicle used for this	activity:		
Year I	Make		Model
Odometer		VIN	

Materials Required

- Vehicle with possible fifth wheel and hitching device concerns
- Vehicle manufacturer's repair information
- Manufacturer-specific tools depending on the concern/procedure(s)

Task-Specific Safety Considerations

- · Activities may require test-driving the vehicle on the school grounds or on a hoist, both of which carry severe risks. Attempt this task only with full permission from your supervisor/ instructor, and follow all the guidelines exactly.
- Comply with personal and environmental safety practices associated with clothing; eye protection; hand tools; power equipment; proper ventilation; and the handling, storage, and disposal of chemicals/materials in accordance with federal, state, and local regulations.
- Always wear the correct protective eyewear and clothing and use the appropriate safety equipment, as well as fender covers, seat protectors, and floor mat protectors.
- Make sure you understand and observe all legislative and personal safety procedures when carrying out practical assignments. If you are unsure of what these are, ask your supervisor/ instructor.
- While working on the vehicle, wheel chocks must be placed on both sides of one set of tires or as directed by your supervisor/instructor.
- Exhaust evacuation hoses must be placed over exhaust outlets while the engine is used in the confined shop space.

► TASK	Inspect, service, and/or adjust fifth wheel, pivot pins, bushings, loc	king
	mechanisms, mounting hardware, air lines, and fittings.	MTST
		IV H 1. P1

Student Instructions: Read through the entire procedure prior to starting. Prepare your workspace and any tools or parts that may be needed to complete the task. When directed by your supervisor/instructor, begin the procedure to complete the task and check the box as each step is finished.

Time off

Procedure:		
1. Reference the appropriate manufacturer's repair information.		
2. Test the locking mechanisms.		
 a. Lock and unlock the jaws several times with a 2-inch lock tester or "dummy" pin. See Figure 21-1. 		
Lock Gauge 2.00° Lock Jaws		
b. If the lock requires adjustment, the adjustment procedures are different depending on the type of locking mechanism. Reference the manufacturer's repair information for the procedure.		
c. Inspect the locking jaw and spring for cracks and damage.		
d. Inspect release levers and handles for damage and free movement.		
3. Perform external examination of the unit.		
a. Inspect for stress cracks/fractures of fifth-wheel plate.		
i. Remove dried grease from the top plate with a scraper.		
b. Check the security of mounting nuts and bolts.		
 c. Check pivot pins and bushing for excessive movement. Using a pry bar, lift upward. Normal travel should not exceed 0.5 inch. 		
d. Check air lines and fittings for leaks with a soapy water solution.		
4. Lubricate the fifth wheel.		
 a. Grease the top plate contact surfaces using water-resistant lithium- based grease. 		
b. Lubricate the lock and pivot with a light oil.		
c. When sliding fifth wheels, spray light oil on the rack and slide path.		

5. Return the vehicle to its beginning condition, and return any tools you used to their proper locations.	
6. Discuss your findings with your supervisor/instructor.	
Non-Task-Specific Evaluations:	Step Completed
 Tools and equipment were used as directed and returned in good working order. 	
Complied with all general and task-specific safety standards, including proper use of any personal protection equipment (PPE).	
3. Completed the task in an appropriate time frame (recommendation: 1.5 or 2 times the flat rate).	
4. Left the workspace clean and orderly.	
5. Cared for customer property and returned it undamaged.

Comments:	
Have your supervisor/instructor verify satisfactory completion of this procedure, any observat	ions made,
and any necessary action(s) recommended.	

Evaluation Instructions: The scoring box below is intended to act as a guide for both student and supervisor/instructor. Each criterion listed will help students to understand what is expected of them and help supervisors/instructors to articulate the level of success at a particular task. The scoring is set up to allow a second attempt at each task (see the Test and Retest columns). Scoring is also designed only to award students points for task criteria that were completed correctly. Points are lost for failure to complete the employability requirements (see Non-Task-Specific Evaluation criteria). When all criteria are evaluated, tally the points for a total at the bottom of each column.

Tasksheet Scoring

	Test		Retest	
Evaluation Items	Pass	Fail	Pass	Fail
Task-Specific Evaluation	(1 pt)	(O pts)	(1 pt)	(O pts)
Student detailed the 3 Cs on the submitted repair order.				
Student used manufacturer's repair information.				
Student performed diagnostic measurements properly and made appropriate conclusions.				
Student completed repairs as directed by the supervisor/instructor.				
Non-Task-Specific Evaluation	(O pts)	(-1 pt)	(O pts)	(-1 pt)
Student successfully completed at least three of the non-task-specific steps.				
Student successfully completed all five of the non-task-specific steps.				
Total Score: <total #="" 4="%" of="" points=""></total>
