CDX Tasksheet Number: MHT6D002

Student/Intern Information

Name		Date	Class	
Vehicle, Customer, and Service Information				
Vehicle used for this activity:				
Year	Make		Model	
Odometer		VIN		

Materials Required

- · Vehicle with possible air conditioning concerns
- Vehicle manufacturer's repair information
- Manufacturer-specific tools depending on the concern/procedure(s)

Task-Specific Safety Considerations

- Activities may require test-driving the vehicle on the school grounds or on a hoist, both of which carry severe risks. Attempt this task only with full permission from your supervisor/ instructor, and follow all the guidelines exactly.
- Comply with personal and environmental safety practices associated with clothing; eye protection; hand tools; power equipment; proper ventilation; and the handling, storage, and disposal of chemicals/materials in accordance with federal, state, and local regulations.
- Always wear the correct protective eyewear and clothing and use the appropriate safety equipment, as well as fender covers, seat protectors, and floor mat protectors.
- Make sure you understand and observe all legislative and personal safety procedures when carrying out practical assignments. If you are unsure of what these are, ask your supervisor/ instructor.
- While working on the vehicle, wheel chocks must be placed on both sides of one set of tires or as directed by your supervisor/instructor.
- Exhaust evacuation hoses must be placed over exhaust outlets while the engine is used in the confined shop space.

▶ TASK Inspect and test HVAC system blower motors, resistors, switches, relays, wiring, and protection devices; determine needed action.

Time off.

Time on_

Total time.

Student Instructions: Read through the entire procedure prior to starting. Prepare your workspace and any tools or parts that may be needed to complete the task. When directed by your supervisor/instructor, begin the procedure to complete the task and check the box as each step is finished.

Procedure:	Step Completed		
1. Reference the appropriate manufacturer's repair information.			
a. Research how to inspect and test HVAC blower motors, resistors, switches, relays, modules, wiring, and protection devices and list your findings:			
2. Using the appropriate manufacturer's repair information, inspect and test HVAC blower motors, resistors, switches, relays, modules, wiring, and pro- tection devices. When testing these components, a working knowledge of a digital volt-ohmmeter (DVOM) is necessary for diagnosis of problems.			
a. Inspect and test blower motors; using a DVOM, check for opens, shorts, or grounds at the blower motor, and check for physical damage that might impede the free movement of the blower fan. List the results of your inspection and tests:			
b. Inspect and test resistors; using a DVOM, check for opens, shorts, or grounds at the resistors. List the results of your inspection and tests:			
c. Inspect and test switches; using a DVOM, check for opens, shorts, or grounds at the switches. List the results of your inspection and tests:			
d. Inspect and test relays; using a DVOM, check for opens, shorts, or grounds at the relays. List the results of your inspection and tests:			
e. Inspect and test modules; if appropriate use a DVOM to check for opens, shorts, or grounds at the modules. List the results of your in- spection and tests:			

@ 2021 Jones & Bartlett Learning, LLC, an Ascend Learning Company

f. Inspect and test wiring; using a DVOM, check for opens, shorts, or grounds at the wiring. List the results of your inspection and tests:	
g. Inspect and test protection devices; using a DVOM, check for opens at the protection devices. List the results of your inspection and tests:	
3. Return the vehicle to its beginning condition, and return any tools you used to their proper locations.	
4. Discuss your findings with your supervisor/instructor.	

Non-Task-Specific Evaluations:	Step Completed
1. Tools and equipment were used as directed and returned in good working order.	
2. Complied with all general and task-specific safety standards, including proper use of any personal protection equipment (PPE).	
3. Completed the task in an appropriate time frame (recommendation: 1.5 or 2 times the flat rate).	
4. Left the workspace clean and orderly.	
5. Cared for customer property and returned it undamaged.	

Student signature Date
Comments:
Have your supervisor/instructor verify satisfactory completion of this procedure, any observations made,
and any necessary action(s) recommended.

Evaluation Instructions: The scoring box below is intended to act as a guide for both student and supervisor/instructor. Each criterion listed will help students to understand what is expected of them and help supervisors/instructors to articulate the level of success at a particular task. The scoring is set up to allow a second attempt at each task (see the Test and Retest columns). Scoring is also designed only to award students points for task criteria that were completed correctly. Points are lost for failure to complete the employability requirements (see Non-Task-Specific Evaluation criteria). When all criteria are evaluated, tally the points for a total at the bottom of each column.

Tasksheet Scoring

	Test		Retest	
Evaluation Items	Pass	Fail	Pass	Fail
Task-Specific Evaluation	(1 pt)	(O pts)	(1 pt)	(O pts)
Student detailed the 3 Cs on the submitted repair order.				
Student used manufacturer's repair information.				
Student performed diagnostic measurements with DVOM properly and made appropriate conclusions.				
Student completed repairs as directed by the supervisor/instructor.				
Non-Task-Specific Evaluation	(O pts)	(-1 pt)	(O pts)	(-1 pt)
Student successfully completed at least three of the non-task-specific steps.				
Student successfully completed all five of the non-task-specific steps.				
Total Score: <total #="" 4="%" of="" points=""></total>
