## Skill Drill 24-2 Inserting a Nasopharyngeal Airway in a Child

<b>Task:</b> Insert a nasopharyngeal airway in a child.					
<b>Performance Observations:</b> The candidate shall be able to correctly insert a nasopharyngeal airway in a child.					
<b>Candidate Directive:</b> "Properly insert a nasopharyngeal airway in a child."					
No.	Task Steps	First Test		Retest	
		P	F	P	F
1.	Determine the correct airway size by comparing its diameter to the opening of the nostril (naris). Place the airway next to the patient's face to confirm correct length. Position the airway.				
2.	Lubricate the airway. Insert the tip into the right nostril with the bevel pointing toward the septum.				
3.	Carefully move the tip forward until the flange rests against the outside of the nostril. Reassess the airway.
