**AACN Protocols for Practice**

From Jones and Bartlett Publishers and the American Association of Critical-Care Nurses—*AACN Protocols for Practice* are authoritative evidence-based practice resources for use by clinicians, educators, and researchers. Each series of protocols makes recommendations for the application, practice, and monitoring associated with a device, procedure, or practice.

These protocols were designed to promote evidence-based practice by providing the latest patient care research findings in a format that is easy to understand and integrate into clinical practice.

The protocols can be used to guide care in a variety of clinical situations in acute care, progressive care, or even in the home. Each protocol is introduced by a case study, which is followed by general information about the technology, occupational hazards, ethical considerations, competency issues, and practice recommendations. Recommendations are rated according to the level of information that is available to support the statement. Annotated bibliographies, suggested readings, and cross references provide guidance for learning more about the specific device or patient care system.

**Professional Nursing Concepts: Competencies for Quality Leadership** takes a patient-centered, traditional approach to the topic of nursing education and professional development. This dynamic text engages students in recognizing the critical role that nurses play in healthcare delivery. Divided into four sections, this text has a unique framework and exclusively covers the Institute of Medicine's (IOM) five core competencies on quality and healthcare for all healthcare professionals.

The first section introduces students to the history of the nursing profession, and covers such topics as nursing education, regulation, and accreditation. Section two explores the healthcare context in which nursing is practiced including continuum of care, health promotion, disease prevention, and illness, nursing ethics, and the nurse's role in health policy. The third section focuses on each of the five core competencies set forth by the IOM, and the final section focuses on the practice of nursing today and in the future particularly exploring the critical issue of the nursing shortage and the transformation of nursing practice.

## Become an Author

We at Jones and Bartlett are committed to publishing exciting new works—both textbooks to be used in nursing courses, and professional resources for those in practice. We rely on people like you to write these works and help us build a collection that can make a difference in the profession.

If you or any of your colleagues have an idea in mind for a new book or learning resource, please contact Kevin Sullivan, Executive Editor ([ksullivan@jbpub.com](mailto:ksullivan@jbpub.com) or call 1-800-832-0034) at your earliest convenience. He will be happy to speak with you about the publishing process and how a new book would fit into a program here at Jones and Bartlett.
